

User Manual

600W LED Follow Spot Light

Welcome you to purchase and use 600W LED Follow light, please read this manual carefully before using the products.

[statement]

The product has passed all the test of company's test departments before sale, it is a qualified products, when you receive the products, please check the products and the packing is intact, then open the package, and check the accessories is complete.

[unpacking and installation]

please put the package on the flat ground up according the up mark on the package, open the packaging , and take out the accessories carefully, please holding the light's handle when you take out the light, then put the light on the flat ground,

[product description]

600W LED Follow Spot Light with high-power LED chip. Suitable color temperature, high color rendering. Light body with all-aluminum materials, volume small size with light-weight, high brightness. High-power fan cooling system to ensure the safety LED Chip, can stability of continuous work. The lights can Close-up of the characters and scenery in stage lighting, theater, film and stadiums and other places

[Technical parameters]

- Power: AC220V-240V/50-60Hz
- Rated power: 700W
- color temperature: 3200K/4500/6500
- Lamp 600W import LED
- Average life: 50000H, control lamp on/off
- Color: 5 colors + white(ROYGBW)
- Zoom: adjust the room big or small, manual adjustment the definition
- Strobe: 1-11hz/S
- projection distance: 10-50meters/10-120meters
- Cooling system: use 6piece 8 mm thick copper tube heat conduction through 132 pieces of large aluminum radiator, ensure the LED bead heat cooling, make the light within the normal range, guarantee the life of lamp bead.
- If the temperature is too high, will Trigger high-pressure protection, use new aluminum exterior design, the light is beauty and generous
- Light size: 810*230*210mm
- Light weight: 15KG

[Attention]

- Warning! 600W LED Follow Spot is used by professionals. Non-professionals do not use it alone in case of danger.

Regular level 3 maintenance of light

Check the tension of screw firmness that operating within the light (color dish's fixed screw)

Clean up the dust and debris and keep the light clean.

Clean the glass lens within the light (reflectors, color piece, corrugated mirror etc.)

The excessive dust, smoke and particles can be eroding appearance of light even damage equipment for overheating

Off the power before detach shell of light

Danger !!!

Please off power before maintaining.

- **Cleaning**

Disconnect the power, cool light completely. Remove the lamp cover.

Use a vacuum cleaner or air compressor produced gas to remove the dust of surface of light.

Optical lens need clean every week, or it will reduce brightness.

Cooling fans need clean monthly. Ensure the vent fan smooth to ensure the cooling effect of the bulb.

Check gas nets, such as clean up jam filter, change filter gas nets when needed.

The clean of gobo must use soft brush. Light internal clean at least six months, can use the vacuum cleaner or air compressor produced gas removal dust.

Color pieces, gobo pieces and the optical mirror need to clean monthly.

Clean optical element be careful, It is easy to stroke and damage of optical components surface, don't using liquor, it may damage the coating surface of optical lens.

In order to ensure the normal function of gobo wheel and focus, we suggest add lubricating oil in the bearings every six months. Remember: oil cannot too much, especially the gobo wheel, or it will cause other problems for the oil would flow when gobo wheel or gobo rotation.

Clean PCB board every three months (too much dust and dirt can lead to PCB work un-normal); Please with soft brush or air compressor produced gas to remove dust (air pressure can not be too strong).

Lamps and lanterns without any useful things except bulb insurance tube,

Please installation and replacement bulbs according to the instructions of the manual.

Replace insurance pipe

If you want to change insurance tube, please replace with original (including current voltage, etc.)

Please draw power plug before replacement insurance pipe, avoiding dangerous!
